

The most thorough tree care EVER or it's FREE!!!

"Read no further if you are looking for cheap, inexperienced, underinsured, chip-n-snip, cut-n-run tree service. Sorry, We just don't do business that way! We rely on our reputation as much as you do, and we'll treat you better than that, every time, I guarantee it!" Brian Allen, President of Archon Tree Service, Inc.

Health & Prosperity...Yours AND Your Tree's

It's hard to call feeding ourselves rich, high calorie, absolutely delicious food "neglect", but ultimately, I suppose I'd have to admit it is. We spoil ourselves rotten over the holidays, neglecting our bodies and our health, and have to face the music come the new year. While Father Christmas might spoil us if we are "nice", Father Time isn't so accommodating. Medical science tells us that **our metabolism slows by 5% every decade after age 25** no matter how good we are. Fact is, you will burn 100 calories less at age 35 with the same exertion and 200 less at age 45 and so on and so forth. Doesn't seem quite fair does it? So, as we all know, and as most of us ignore in order to enjoy the decadence of mom's pie, Dad's deep fried turkey & Aunt Edna's raspberry brie filled croissants, weight gain prevention is worth 10 lbs of exercise cure. But when things are going good, we feel great, we still fit into our jeans, and our ticker is still-a-tickin', it's hard to invest in such wisdom. We wait until the 5 lbs turns to 20 and is so much harder to get off, or until taking the stairs becomes a health risk instead of a health investment. We know better, but it's our nature. We need incentives, like competition with the new young buck at work, or the threat of bikini season. **Same goes with tree care.** We know the damage that can be done by those 100 foot beauties if they aren't kept in shape, or removed once they are too old and brittle to withstand the elements. But we wait . . . Because they *seem* alright. Especially when it's 45 degrees out in mid December and we haven't seen a real winter storm yet. We wait till the wind hits & uproots that unstable tree from the wet ground, until a root breaks a pipe, or our kid is lying with a broken arm beneath the brittle branch he'd been trying to climb. Well, we can't give you will power against Grandma's cobbler, but we CAN prevent all of THAT! **We are offering FREE Health & Hazard assessments on all of your trees!** We will cover everything from weakness due to lack of proper pruning, external & internal decay, cracks in limbs, hazardous root growth or placement, improper fertilization, and infestations. A written report of our findings will be available to you upon request - **a \$100 value!** We want your business, but even more so, we want you and your trees healthy and your family and property safe. **Call us TODAY!!!**

Here's what our fantastic clients have to say about Archon Tree Service!

"Your crew arrived and worked HARD! Harder than the estimate said they would need to. They could have left some straggling tops that were not mentioned in the estimate but they went the extra mile and produced the results we wanted. As a result, we have a beautiful low tree line now that is natural looking. We really don't remember when we have had anyone work around our house who has shown that much initiative, consideration and integrity. Thank you for leading such an excellent company! We figure your workers follow your lead and want you to know that your level of service is unusual and was a gift on top of having our view cleared!"

Sincerely,

Susan & Chris Sekoyta-Smith
